

Instructions

Please write your name in CAPITALS and complete the Candidate number in the spaces below.

Use a PENCIL (B or HB)

Rub off any answers you wish to change with an eraser.

No calculators, mobile phones, smartwatches, or any electronic devices are permitted.

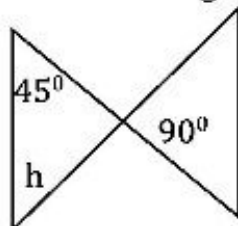

Show all workings clearly in the answer booklet provided.

Maintain **silence** during the exam. Raise your hand if you need assistance.

Candidate Name			
Country	NIGERIA	Class	YEAR 7
CRC	EMC25001	Candidate Roll No	

NATIONAL ROUND

- Sam is buying new art supplies. She has £40 to spend. She wants to buy a sketch pad that costs £ 11 and as many paint brushes as she can. Each paint costs £4. Write an inequality that shows how many paint brushes (P) Sam can buy.
The expression $6x + 5y + 12z + 2$ has 4 terms. (Question 2-5)
- List the terms
- What is the constant term
- What is the coefficient of x
- Which letter has a coefficient of 12
- Find the measure of angle h.

- Eleven students measured their heights in inches. Below is a list of their findings. Find the mode of the data.
47, 46, 48, 55, 54, 48, 47, 45, 51, 52, 48.
- Solve the two-step algebra equation: $7h - 8 = 41$
- Larry creates a scale drawing of the tree house he wants to build. In his drawing, the perimeter of the tree house is 20 inches in length. If each inch in Larry's drawing represents 2 feet, then what will be the true perimeter of Larry's new tree house?
- State the number of terms in; $15a + 4b - \frac{4}{3}ab + 3c$

The table below shows the total amount spent on groceries during a 12-week period (Question 11-12)

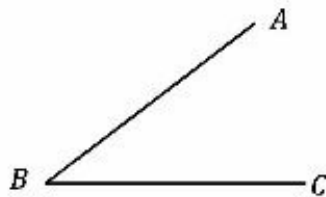

£72	£126	£84	£113
£113	£142	£126	£126
£97	£111	£108	£95

Calculate

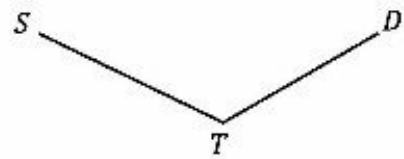

- 11) The mean
- 12) The median
- 13) A train travel 420km at p km/hr and remaining 420km at 140km/hr. Total time taken by train to cover the whole distance is 6 hours 30 minutes. Find the time taken by train to cover 600km at p km/hr.

Name the letter of each vertex

14)

15)

- 16) Mr. Chapman needs to calculate the average test scores his students achieved on their spelling tests. Below are lists of the student's scores on four different tests. On which tests did the students achieve the highest average score?

- Test 1 scores: 85, 87, 90, 84, 85, 94, 99, 100.
- Test 2 scores: 98, 97, 88, 85, 91, 93, 79, 94.
- Test 3 scores: 86, 99, 74, 84, 96, 95, 85, 100.
- Test 4 scores: 95, 94, 93, 98, 88, 89, 98, 98.

Sarah works as a sales clerk at cycle sports. During the first 12 days of the month, the store sold the following number of bikes:

16	32	27	19
19	23	19	32
25	20	35	33

- 17) Calculate the median
- 18) Calculate the mode

Draw the number line representation of each of the following inequalities:

- 19) $4 \leq x < 9$
- 20) $-6 < x < 2$
