

GRADE 5

Write an expression to explain each pattern (Question 1 and 2)

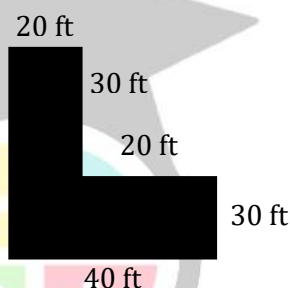

- 1) 46, 43, 40 37, 34
- 2) 542, 533, 524, 515, 506
- 3) Joel says the number 63 is prime because it is an odd number, is he correct? Explain why or why not?

The area of a rectangle is equal to the product of the length and the width of the rectangle. If A represents the width, the formula would look like this. $A = L \times W$. find the perimeter and area of each figure.

4)

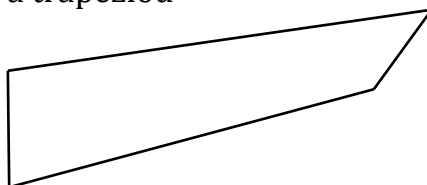

(5)

Vannah built a rectangular prism with 48 centimeter cubes. She put 16 cubes in each layer.

- 6) How many layers of cubes does her prism have? _____
- 7) What are the dimensions of the prism? Give as many possible answer as you can.
- 8) In its lifetime, a ladybug can eat about 50, 000 aphids. How many ladybugs will it take to eat about 1 million aphids?
- 9) Represent and describe the number 791 284 in as many ways as you can.
- 10) Explain why this quadrilateral cannot be called a square, a parallelogram, a rectangle, a rhombus, or a trapezoid

- 11) Pat needs 48m of fencing to surround her rectangle rose garden. What could the area of pat's garden be? Give as many answers as you can.

Write the next three numbers in the pattern.

- 12) $(n + 4)$
156, 160, _____, _____, _____

13) $(n + 10) \times 3$

21, 93, _____, _____, _____

One concert ticket costs £11

14) Complete the table to find the cost of 7 tickets

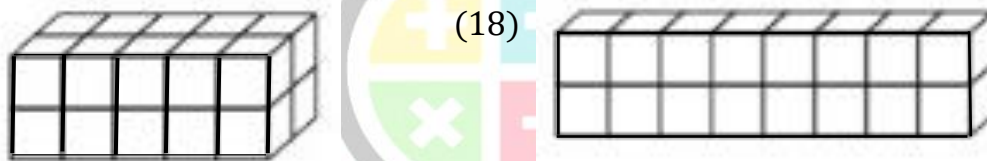

Number of tickets	Costs £
1	
2	
3	
4	
5	
6	
7	

15) Write a pattern rule for the cost.

16) Extend the pattern. How many tickets can buy you with £155? _____

These rectangular prisms are made with centimeter cubes. Find the volume of each prism.

17)

(18)

Rolling a Number Cube

Number Rolled	Ali	Yola
1	HH I	III
2	IIII	HHH
3	IIII	HHH I
4	HHH I	III
5	HHH	HHH II
6	HHH	HHH I

19) Draw a double bar graph to display the data in the table.

20) How many rolls did each person make?
